3.3 Default Units translated

3.4 Product Description page changed to Product Info
1 Release Highlights

Disclaimer: After the new version has been released, all the ON!Track users should log out first and log in back to ON!Track both on the mobile and the web application to be sure the new version of ON!Track will work as it’s intended.

The V3.0 release focused on bug fixing and stability issues mainly, while additionally delivering some minor new features such as: improved Category and ID management for Assets/Consumables/Commodities, requesting a tool repair from ON!Track in countries where available and highlighting quantity and from location for Consumables/Commodities when transferring them and Confirm Delivery is enabled. Finally, one new language (Greek). The rest of this document will provide a more in-depth overview of what is included within the V3.0 software release.
2 New Features

2.1 From Location and Quantity in Confirm Delivery

To improve transparency and for better usability from now on whenever a Consumable or a Commodity is included in a transfer while “Confirm Delivery” is enabled, the amount and the from location of the Consumable or Commodity which were transferred will be prompted and shown for better transparency of the transaction which needs to be confirmed.
2.2 Confirm Transfer List Deletion on Mobile

From now on, whenever a transfer list is populated on Mobile with items to transfer from one location to another tapping on the “trash bin icon” will prompt a “Delete Transfer Cart” popup message to avoid mistakes. Even after tapping yes on the “Delete Transfer Cart” popup window an undo option will be available via a toast message in the bottom of the ON!Track application.

Transfer Cart list:
Delete Transfer Cart:

Undo after tapping Yes:
2.3 Request a Repair for a Hilti Tool

From now on for Hilti tools and Hilti fleet customers in GPDH2 countries it is now possible to request a repair for a Hilti tool straight from ON!Track itself. As of now the functionality is only enabled one by one, a service request cannot be ordered for multiple tools at a time, just one by one. To do so, simply select the tool in the web application which requires a service and click on the „request service“ icon (a wrench logo) then the user will be re-directed to the local country specific Hilti Online webpage where he or she can log in with his or her Hilti Online username and password and proceed with the tool repair request. However if the user is already logged in to Hilti Online (in a separate tab for example), the repair request button will redirect straight to the repair request page on Hilti Online.

3 Enhancements/Improvements

3.1 Assets/Consumables/Commodities ID Management Change

For better ease of use and clarity the Assets/Consumables/Commodities ID management have been changed. Thus, the former Asset Details view have been changed to Category & IDs.
3.1.1 Web Changes

Old Web View:

![Old Web View Image]

New Web View:

![New Web View Image]
As you can see from above the asset details fields have been re-arranged to give a better and easier overview about an Asset’s/Consumable’s/Commodity’s attributes.

Category & IDs section includes:

- Category
- Scan Code Type
  (This is a new field by default the type is always ‘Barcode’ for Consumables and Commodities, for Asset the type options ‘Barcode’ and ‘Hilti Smart Tag’ are available in countries where the AI T380 Hilti Smart Tags are already being sold.)
- Scan Code
- Alternate Code
- Serial Number

Details section include for Assets:

- Template Name
- Manufacturer
- Model
- Description
- Asset Status
- Friendly Name

For Commodities:

- Manufacturer
- Model
- Description
- Quantity
- Friendly Name
For Consumables:

- Manufacturer
- Model
- Description
- Unit
- Friendly Name

The Scan Code Type will be always visible on the Asset Side Panel as well.

### 3.1.2 Mobile Changes

On the mobile application when adding a new Asset, the Add Hilti Item option is hidden from now on for SAP ByDesign countries. When adding an Asset, the barcode scanner usage is mandatory from now whenever the “Scan Code field” wishes to be populated. The “Alternate Code field” still could be edited manually. The Asset Details/Commodity Details screens have been adjusted to reflect the changes on the Web also.
Mobile Old View:

Mobile New View:
The Scan Code Type will be always visible in the Asset Details menu section.

### 3.2 Alerts Improvements

The Alerts module have been re-worked to eliminate various alert scheduling issues which were recurring previously.

### 3.3 Default Units translated

The Introduced default units with the V2.9 release have been translated to supported languages, such as:

- EACH
- BOX
- CANS
- LBS
- TONS
- SHEETS
- FEET
- YDS
- METERS
3.4 Product Description page changed to Product Info

The Product Description page’s contents have been updated.
